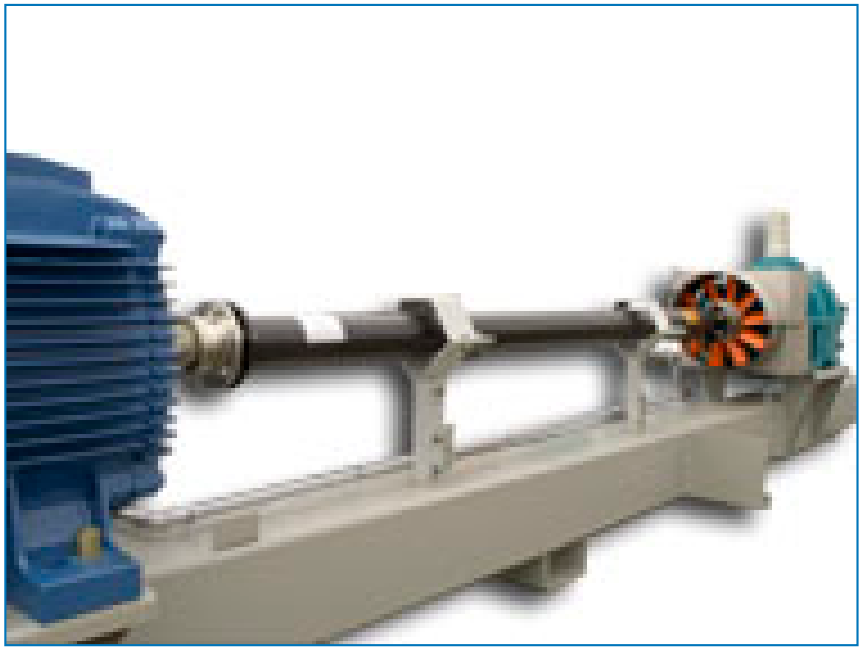
Options and accessories

Gear drive system with externally mounted motor



The gear drive system is a good option for **certain industrial application**s.

The gear drive system, designed with a 2.0 service factor, includes:

- A TEFC motor mounted outside the unit and air stream
- A corrosion resistant carbon-fiber drive shaft with stainless steel hubs

Both motor and drive shaft are separately shipped for easy on-site installation.

Want to benefit from gear drive system on your cooling equipment? Ask your local BAC representative for more information.
